

Charity Token

Guide

What is Charity Token?

Charity Token is a revolutionary new platform that aims at removing many of the middlemen and inefficiencies of the Charity Sector. Our goal is to support the many small non-profits around the World in dire need of direct funding.

How does it work?

Step 1.

Download our Charity Token Mobile app from the Play Store.

Step 2.

Sign up using your email and password

*Remember to check your junk folder for our verification email

Step 3.

The home screen contains all of the information including;

- Donations
- Available Tokens
- Earned rewards
- Links to other functions

Step 4.

You can send tokens to this wallet from another Polygon wallet or purchase tokens in app using our payment gateway.

***Matic MUST be sent to the wallet first for transaction fees (gas)**

Step 5.

Our app has a swaps facility. You can swap Matic into Charity Tokens or USDT and vice-versa.

Step 6.

This is our Library. It is the main feature and the basis of our design. Charity Token searches to find small Charities that have little opportunity for funding and we list them here for you to donate to them DIRECTLY, without any middleman.

Donors can see a wealth of information on each Charity profile including;

- Name, Location
- Date joined
- Total contributions
- Bio, Contact details
- Any documentation
- Donate button

Step 7.

The transfer function is used to removed tokens from the Charity Token mobile app to an external wallet.

Please enter a valid Matic wallet address to send tokens to.

There is also space for a transaction note.

Extra Information

The app also contains a list of every transaction on the app.

You also have the ability to save each transaction as a Pdf file.

Simply click on the transaction to see all details, click the download arrow in the top right corner.

Charities earn passively as users transact. The fees removed by our smart contract each time Charity Tokens are transacted with, are swapped into Matic, then equally divided up and sent to each listed Charity.

This makes Charity Token the truest "transact to donate" platform in the World.

Charity Token has a notification screen. This will alert you of any incoming transfers and other requests

For holding Charity Tokens in the wallet, you automatically earn more tokens each time a concurrent transaction happens on the network in ChaT.

Rewards are shown in ChaT and give real time status on the amount of tokens the wallet has received in rewards.
